Q&A session about all things General Practice with Wendy O'Meara

Wendy is an experienced general practice educator, who enjoys improving processes to maximise outcomes in general practice.

Most recently she has delivered education sessions to Aboriginal Community Controlled Health Organisations and general practice staff on MBS items for chronic disease management, practice triage and managing abusive behaviour.

Wendy regularly facilitates business coaching sessions to help practice staff understand PRODA-WIP, SIP, PIP, as well as how to maximise income, and support and retain staff.

Come along to this interactive session. Wendy will start with a brief presentation and then answer your questions.

For more information go to: [General practice support services - Larter Consulting](#).
