

Beyond MDT Team Care Arrangements: Delivering Integrated Multidisciplinary Care That Truly Matters

Join Dr Paresh Dawda (GP – Prestantia Health and Next Practice Deakin) for this webinar exploring how general practice and allied health can better work together to deliver both person-centred and population focused multidisciplinary care that matters to patients.

Providers will gain insights into the MBS Chronic Care Item Changes and how to unlock opportunities for their practice and optimise patient care.

Learning Outcomes:

- Explain the benefits of the new MBS Chronic Care item and numbers for people living with complex and chronic conditions.
- Explain the implications of the new MBS Chronic Care items and numbers for health professionals and practices including primary care and allied health.
- Interpret how high performing person-centred multidisciplinary team-based care is delivered.
- Identify a population health approach to establishing a person-centred and integrated care model to deliver comprehensive, continuous and coordinated care.

Don't miss this opportunity to enhance multidisciplinary care within your practice.
